### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The prior art of record does not provide for, nor suggests providing for the features newly added in the last amendment when taken in conjunction with the other limitations of the independent claims. McMillan does not clearly teach the claimed "encoded network address", rather returning the IP address of the user. Furthermore this language is not clear as to how this feature meets the claimed limitation. Ohashi additionally does not specifically teach the use of copy prevention techniques which are restricted only to what is shown on the screen at one time, as Ohashi only relies on "tag information" with respect to the document, not specifically as to what is shown on the screen. Since the document may encompass more than what is shown on the screen, this is considered different. For these reasons, in conjunction with the other limitations of the independent claims, and further in conjunction with the Decision by the Board of Patent Appeals and Interferences, dated December 20, 2006, this case is in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
